

What's New for 2005!

(Effective February 21, 2005)

For Educators:

- No more JAVA™ required! This means faster, smoother system performance and fewer calls to your IT department.
- Real-time reporting of your institution's available test and course unit balances.
- Manual assignment of assessment-generated prescriptive coursework now provides easier review and modification of a student's coursework before granting access.
- Default settings for minimum student performance in prescriptive coursework can now be modified by the institution.
- Easier assignment of additional tests and re-tests for students already entered in the *A+dvancer™* system.
- System user look-up by first name, last name, ID, etc.
- Improved reporting for student assessment results.
- New reports for test and coursework unit consumption detail and summary by student and by institution.

For Students:

- No more JAVA required! Move from the lab, to the library, to home without the need to have the right version of JAVA on each workstation.
- Page counters in assessment tests and other areas to aid in proper time management.
- Automatic response reminders with detailed instructions to foster trouble-free system usage.
- Real-time display of student performance and minimum required performance using the optional prescriptive coursework.
- Assignment dates and expiration dates are now displayed, so planning adequate time for study is easier.
